

Skill road map record

Please note: If you are asked to record a new skill please keep in mind we may place the tradesman on a project because they can produce that particular product or skill. If you have any questions please call Andrew on 0739786614. Southern Cross uses the skill road map to help give its members direction in their future at the company and understand what they can do to play a more rewarding role for themselves, our clients and Southern Cross. It will be used as a tool to help select what projects a member will be placed on, that could be to develop a new skill or utilise an existing one.

Most skills have three levels.
Please sign when the skill has been obtained.

Level 1

The tradesman can produce the product/skill as part of a team, lead by a member from SC or our clients.

The tradesman is ready to start producing the product under their own guidance.

Level 2

The tradesman can produce the product to a high standard and in most situations.

A level of skill has been obtained to plan, layout and execute the product/skill.

The tradesman is ready to start teaching the production of the product/skill to others.

Level 3

The tradesman can produce the product/skill to a high standard continuously.

Tradesman that learn from this person can produce the product to a high standard and in most situations.

The tradesman teaches the skills needed to plan, layout and execute the skill.

The tradesman is familiar with the health and safety, AMA and other quality controls used to produce this product.
